

For Immediate Release
October 19, 2009

INabstracto
Mid Century Modern Furniture

***Horsee!* The Animaze Collection**

Launch: Thursday, October 29, 6:00 – 9:00 p.m.
INabstracto, 1160 Queen Street West (at Beaconsfield)
Toronto, Canada

Combining great complementary talent often creates an extraordinary dynamic – this fall, Kate Eisen of INabstracto and artist, Julie Jenkinson are collaborating to bring together Mid-century modern design and Jenkinson's new collection of fine art prints and wall coverings.

Horsee! launches Thursday, October 29, 6:00 – 9:00 p.m. at INabstracto, 1160 Queen Street West (Queen and Beaconsfield).

Jenkinson's collection at INabstracto is playfully dark yet stunningly informed. A product of her obsession with a cast of characters and creatures drawn from both imagination and the subconscious, *Horsee*, *Skit the Cat*, *Hoofs for Teeth* and *Jeepers the Jack Ass* are among some of Julie's cast of singular and family members.

Now luxuriantly animated into limited edition wall coverings and fine art prints from her series *Multiparous*, *Monster Book for Boys & Girls* and *Coal*. British-born Jenkinson's work has been exhibited in Washington DC and Toronto and is also included in NYC's prestigious The Drawing Centre Viewing Program.

Admirers of Eisen's eye for great modernist furniture will recognize Jenkinson's and Eisen's mutual love for animals and creatures, which is combined with a sparse, quirky, minimalist and well-executed design in this inspired and lively collaboration of retail space and art exhibition.

Horsee! Charles and Ray Eames and Frank Gehry never felt so at home together!

Exhibition dates: October 29 – January 31, 2010

Julie Jenkinson's wall coverings and prints will be available throughout 2010 at INabstracto
